

## **Everyone has unalienable rights. Use them!**

This is what we are currently up against...

**H.R. 8** – The so-called “universal background check bill” would criminalize private gun transfers, put roadblocks in the way of someone who needs a gun in an emergency situation, and is unenforceable without a national gun registry.

**H.R. 1446** – A bill that would give this administration the ability to grind the instant background check system (NICS) almost to a complete halt, could force you to file a special petition with the FBI before you’re allowed to buy a gun, and will ultimately transform your Second Amendment “right” into a “privilege”.

**H.R. 127** – The bill that would force you, your spouse, and your family and closest friends to undergo a government psychological exam before the government decides whether you are allowed to own a gun.

**H.R. 1005** – A bill that would allow the government to retain your gun purchase records for a full 90 days, and open the door to permanent national gun registration.

**H.R. 130** – Legislation that would require you to keep your guns unloaded and locked up so they are useless for self-defense.

**H.R. 2814 and S. 1338** - Bills to repeal the Protection of Lawful Commerce in Arms Act, and provide for the discoverability of gun trace information in civil proceedings – thereby exposing gun manufacturers and gun stores to crippling, billionaire-funded lawsuits that will drive most of them out of business.

### **PLUS...**

- Plans to ban millions of sem-automatic firearms and every magazine that can hold more than ten rounds.

- Plans for nationwide gun confiscations that would force tens of millions of gun owners to hand their firearms over to the federal government.

- Plans to ban online ammo sales – making it even harder to purchase ammunition during this national shortage.
