

Woods Walk - Safety Rules

Observe all NRA Safe Gun Handling Rules, and comply with the following HH&A Woods Walk match-specific rules:

- Ear & Eye protection are required for all shooters and spectators.
- All guns must be kept unloaded, and holstered or bagged, until you're called to the firing line by the Squad Leader and have been given the command to handle your gun.
- Shooters will be called to the firing line one at a time.
- Shooters must follow commands to handle, load, fire when ready, cease fire, and show clear as issued by the squad leader.
- When on the firing line, keep your muzzle pointed safely downrange at all times. We will have other squads to our left and right, and we have houses over the top of the hill.
- It is ok to load your magazines or speedloaders for next stage, but absolutely no gun handling is allowed behind the firing line.
